DON'T LOSE OPPORTUNITIES

Every aspect of the student lifecycle relies on having correct contact data. The consequences of having incorrect contact data costs your institution time, money, and opportunity.

There are countless factors that contribute to data inaccuracies. Reasons such as misspelled street names, missing apartment numbers, incorrect postal codes, missing contact information, and transposed house numbers are just a few examples of grounds for data error. With over 50 million individuals, families, and businesses moving each year, it is crucial to keep contact data as accurate and up-to-date as possible. Verify, correct, update, and standardize your contact data using the leading integrated data quality solution for Higher Education from Runner EDQ.

CLEAN Integrated Enterprise Contact Data

From prospect to graduation, **CLEAN_STUDENT™** is the solution for dealing with all of your student contact data throughout the various stages of a student's lifecycle!

Runner EDQ - The LEADER in integrated contact data quality for over 20 years.
